<b>Name</b> Blackberry	<b>Price</b> \$9.99
<b>Variety</b> Boysen Blackberry	
<b>Description:</b> The original "Boysenberry": a Rubus (caneberry) hybrid of uncertain origin cultivated and promoted by Walter Knott (eventually Knott's Berry Farm) near Anaheim, California beginning in the 1920s and 30s. Large, juicy, delicious, sweet-tart berries famous for jams and pies. Also wonderful fresh, especially when picked just right and consumed within a day or two. Vine-like, trailing, thorny growth habit. Generally more	<b>Quantity</b> 50

---

<b>Name</b> Blackberry	<b>Price</b> \$9.99
<b>Variety</b> Olallie Blackberry	
<b>Description:</b> A cross between Youngberry and Loganberry, classified as a blackberry. Large, elongated fruit with unique sweet-tart flavor: a long-time California fruit stand favorite for fresh-eating, pies and jams. Vine-like (trailing) structure, requires support. Lower chilling requirement than Boysen. Takes up to two years to bear. Zones 7-9, possibly 6-10.	<b>Quantity</b> 50
	<b>Grower</b> Weeks B

---

<b>Name</b> Blackberry	<b>Price</b> \$9.99
<b>Variety</b> Thornless Logan Blackberry	
<b>Description:</b> A unique and flavorful berry! This natural cross between blackberries and red raspberries produces long, tasty, dark red berries that are good for fresh eating, juicing, or making pies, jams and jellies. Thornless canes grow horizontally, so supports help keep fruit off the ground. Berries are sweetest when allowed to ripen on the bush. Heat-tolerant.	<b>Quantity</b> 100
